Listing of the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-43. (Withdrawn)
- 44. (Original) A data storage device for housing data from functional areas of an enterprise, the data storage device comprising:

at least two hubs, wherein each of the at least two hubs includes a primary key, a stamp indicating the loading time of the primary key in the hub, and a record source indicating the source of the primary key;

at least two satellites, wherein each of the at least two satellites is coupled to at least one of the at least two hubs in a parent-child relationship, further wherein each satellite includes a stamp indicating the loading time of data in the satellite and a business function;

a link to provide a one-to-many relationship between two of the at least two hubs; and

a detail table coupled to at least one of the at least two hubs, wherein the detail table includes attributes of the data from the functional areas of the enterprise.

- 45. (Original) A data storage device as claimed in claim 44, wherein each of the at least two satellites further includes at least one of a primary key, business data, aggregation data, user data, a stamp indicating the time of at least one of user data insertion and user data alteration, and a record source.
- 46. (Original) A data storage device as claimed in claim 44, and further comprising a second satellite coupled to at least one of the at least two hubs in a parent-child relationship.
- 47. (Original) A data storage device as claimed in claim 44, wherein the link includes at least two foreign keys and a stamp.
- 48. (Original) A data storage device as claimed in claim 44, wherein each of the at least two hubs further includes an associated business key and a stamp includes indicating the loading time of the associated business key.
